

NOTE! In the Boober Caboose you will probably need to turn the Led lighting on a 45 degree angle so it fits perfect, you may also need to use a little double face tape near the ends to make it stay better.

Bobber Caboose Installation 2"x 2" x 2" LED Light with Tail Lights

← Power lead wires from wheels

Bottom Floor of Car

Locate Anti-Flickering Device →
and use double face tape to
keep it in place

**If there is no hole for the wires
from your wheels drill a small
hole to feed the wires up inside
the car**

Tail lights can be located anywhere you
like.
